Component View 10: Poll Module

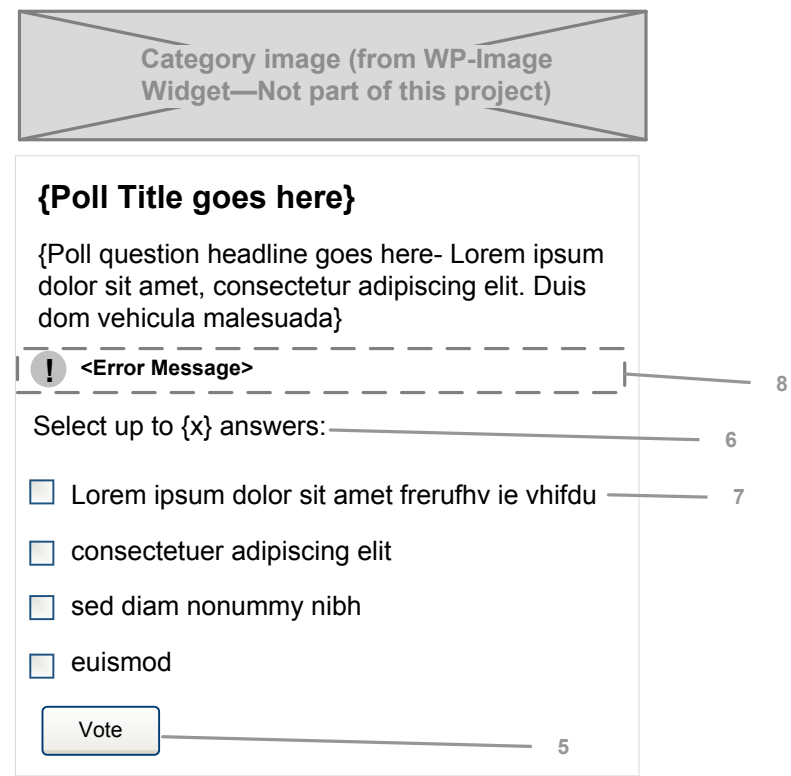

Condition 10 – Default View – Single Select

This condition applies during onLoad state

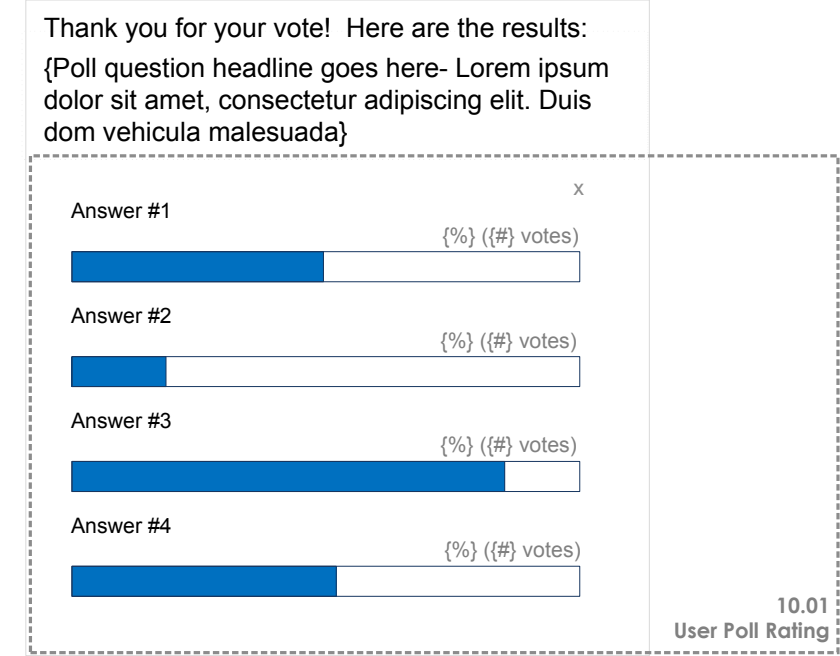

Condition 20 – Default View – Multi-Select

This condition applies during onLoad state

Condition 30 – After Voting

This condition applies after on-click “Vote”

MODULE CONDITIONS

1 – Category Graphic
Type: Graphic
Functionality: The Graphic widget can be used to display graphics above or to the side of this poll. However, this is outside the scope of this project.

2 – Poll Title
Type: Text
Functionality: Max number of characters is 60.

3 – Poll Question
Type: Text
Functionality: Max number of characters is 120.

4 – Poll Answers – Single Choice
Type: Radio Buttons
Functionality: **Allow the display of** Up to 4 answers with a minimum of 2. Answers must not be over 45 characters.

5 – <Vote> button
Type: Call-to-action button
Functionality: **If logged in,** will display confirmation of answer selected (see condition 30). If not, it will display the login popup.

6 – Maximum choices
Type: **Dynamic** Text
Functionality: Display the maximum number of answers a user may select.

7 – Poll Answers – Multi-Choice
Type: Checkboxes
Functionality: Allow display of up to 4 answers with a minimum of 2. Answers must not be over 45 characters. If a user selects more than the maximum number of allowed choices, then when they press “vote” display an error message.

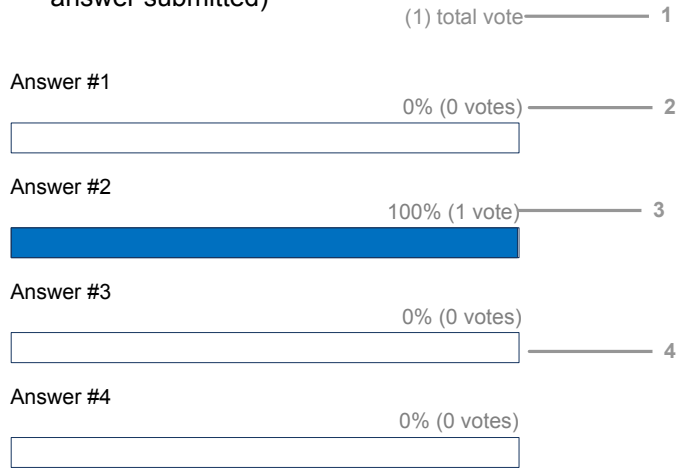

8 – Error message
Type: Conditional text
Functionality: If user selects more than the maximum number of answers permitted (see callout #6), when the user clicks the “Vote” button, display the error message “You have selected more than the maximum number of answers allowed”.

Documentation Note 10/9/2012
Exact error message text to be provided by Copy.

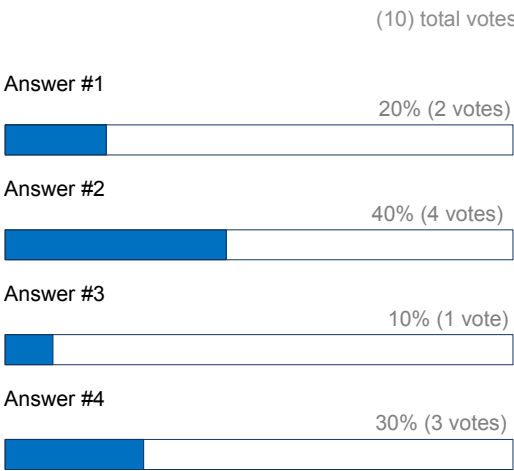

10.01: Results Distribution

Condition 10 – At least 1 vote submitted

- Shown for the first user who votes on the poll (at least one answer submitted)

Condition 30 – > 1 vote

MODULE CONDITIONS

1 – Total Vote

Type: Display

Functionality: Shows the total # of people that voted for that question

Values: - If less than 500, it will display the actual number
- if more than 500, it will display 500+

2 – Total votes for answer and % of votes per answer

Type: Display

Functionality: Shows the total # and % of people that voted for that question

Values: - If less than 500, it will display the actual number
- if more than 500, it will display 500+
-0-100%

3- “Vote vs. “Votes*

Display: Display “vote” when there is only one vote and “votes” when there are multiple (or zero) votes.

4 – Bar graph

Type: Image

Functionality: Rectangle bar length proportional to the % of the total answers.
