1. **Header (logo/navigation)**

2. **Slider (we can use the current Communities slider)**

3. **Question section which can be used as the discussion portion (has share functionality, a plus featured which doesn't need to be developed but modified to your theme)**

4. **Blog Post (current lay-out for Communities is the other option you guys wanted in the wires, this will only require modification as oppose to the vertical image layout which would require more dev time)**

5. **Hardcoded (new)**

6. **Filtering (new)**

7. **Pagination (new)**
